#### Contribution to Community:

Borusan has adopted as one of its primary principles the concept of giving back to the community with which it does business. In order to better fulfill its social responsibility vision, the activities of the Asım Kocabiyık Culture and Education Foundation, which was founded in 1992, and Borusan Culture and Arts, established in 1997, came together under one roof in 2008 to become the Borusan Kocabiyık Foundation. With a deep social responsibility consciousness, the Borusan Group established the Borusan Center for Culture & Arts on October 15, 1997. The Borusan Center for Culture and Arts is a member of the International Society of Contemporary Music (ISCM) and the European Music Council (EMC) and organizes the annual Mediterranean Contemporary Music Days. It pursues its music activities through its prominent Borusan Istanbul Philharmonic Orchestra, the Borusan Chamber Orchestra, the Borusan String Quartet and the Borusan Children's Choir, as well as its Music Library.

## Celebrated 50<sup>th</sup> anniversary in 2008...

Borusan Mannesmann; the flagship of Borusan Group, operates with five mills, four in Turkey and one in Italy with a total annual production capacity of 925.000 tons. We produce our spiral welded (SAWH) and longitudinal welded (ERW) products using the latest production techniques.

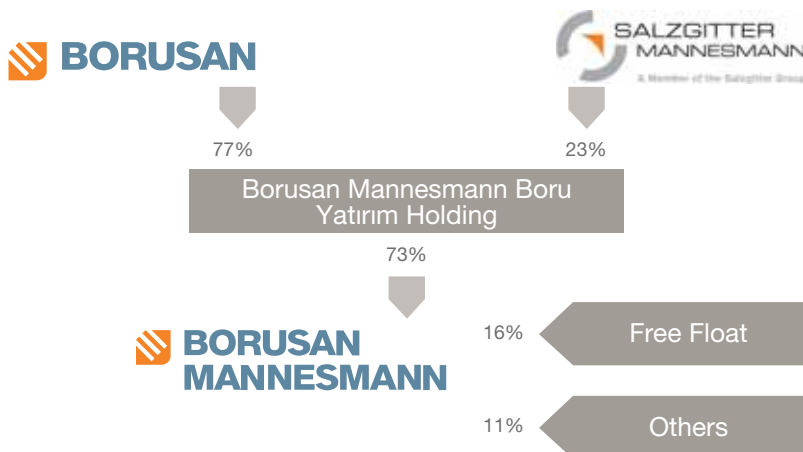

As the leader of Turkish steel pipe market, Borusan Mannesmann owes this outstanding position to its 50 years of corporate structure experience, continuous development and customer oriented approach. Especially in line pipe business, Borusan Mannesmann has an established reputation in providing an extraordinary level of quality, reliability and commitment in its products and services. We have a track record which has a wide range in oil and gas pipeline applications both in Turkey and International markets with high grade API standards. Our SAWH line pipes (dia. 14"-100") are not only used for gas, oil and water transmission but also for piling applications.

Giving priority to product quality and qualified work force in our growth strategies, we aim to meet customized expectations of our customers throughout the world. Our Pipeline Projects Management Team, specialized in providing total solutions to its customers in pipe supply contracts that includes manufacturing processes, contract management, production and integrated logistics services worldwide.

## Corporate Structure:

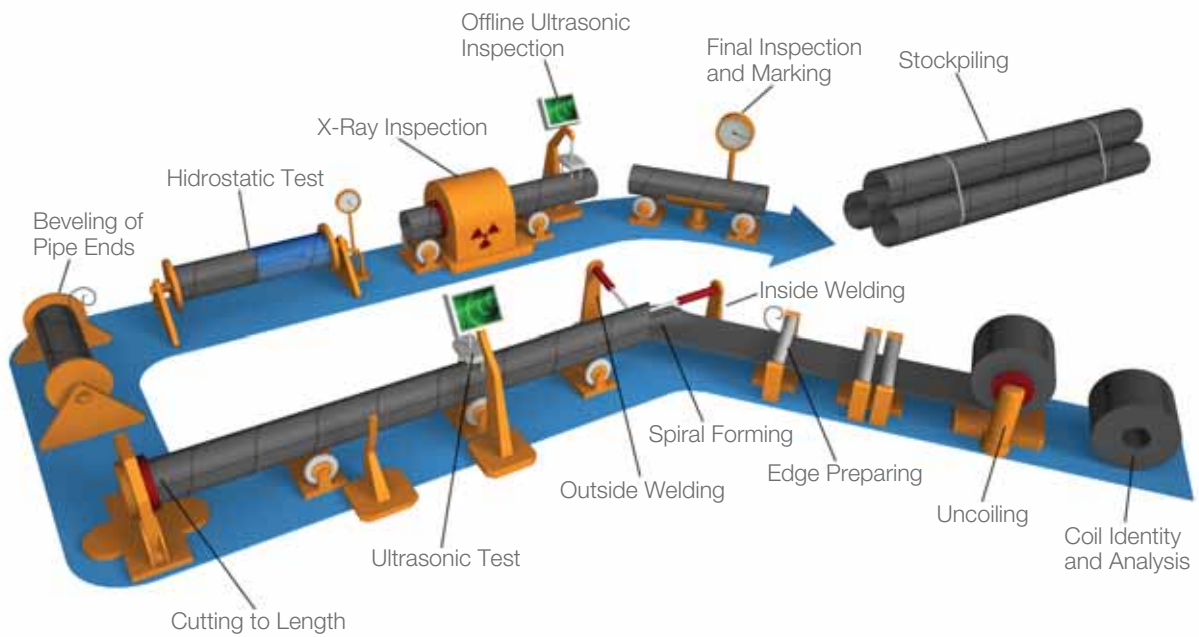

Borusan Group and one of Europe's leading steel and technology companies; Salzgitter Mannesmann GMBH, merged their welded steel pipe investments in Turkey and named that partnership; "Borusan Mannesmann Boru Yatırım Holding" in 1998. The company has 77% shares of Borusan Mannesmann Boru San. ve Tic. A.Ş.

## Production Flow

### SAWH Pipe Production - Helical Submerged Arc Welded Pipe

## ERW Pipe Production - Electric Resistance Welded Pipe
